

Sales Performance Dashboard

Data Analyst Internship · Task 4

 POWER BI

 SAMPLE SUPERSTORE DATASET

Project Overview

Objective

Design an interactive Power BI dashboard enabling business stakeholders to monitor performance, identify trends, and make informed decisions — all from a single, unified view.

Key Focus Areas

→ Sales Performance

Track revenue and order volume over time

→ Customer Behavior

Analyze purchasing patterns by segment

→ Profitability

Measure profit margins across segments

→ Regional Analysis

Compare performance across regions

Dashboard Features

The dashboard combines high-level KPIs with detailed visualizations and interactive filters for end-to-end sales analysis.

KPI Cards

Total Sales, Profit, Orders and Profit Margin % displayed at a glance.

Monthly Sales Trend

Time-series analysis revealing growth patterns and seasonal fluctuations.

Sales by Category

Breakdown across Technology, Furniture, and Office Supplies.

Profit by Region

Geographic comparison highlighting the most and least profitable regions.

Interactive Filters & Slicers: Users can filter by date range, region, category, and segment for dynamic, self-service analysis.

Key Insights

Technology is the highest-selling category.

Consumer segment drives the largest share of revenue.

Sales show consistent growth over time.

Regional profitability varies significantly across the business.

Top 10 products account for a substantial portion of total sales.

What the Data Reveals

Technology Leads

The Technology category outperforms Furniture and Office Supplies in total sales volume.

Consumer Dominance

The Consumer segment is the primary revenue driver, significantly ahead of Corporate and Home Office.

Steady Growth

Monthly trends indicate consistent sales growth, signaling a healthy business trajectory.

Regional Gaps

Profitability varies significantly by region, revealing opportunities for targeted investment.

Conclusion

This dashboard transforms raw Superstore data into a clear, actionable intelligence tool — empowering stakeholders to act with confidence.

Clear Visibility

Consolidates sales, profit, and customer data into a single, easy-to-navigate view.

Performance Monitoring

Enables real-time tracking of KPIs and trends to spot opportunities and risks early.

Data-Driven Decisions

Supports strategic planning with evidence-based insights rather than intuition alone.

Interactive Efficiency

Filters and slicers reduce analysis time, enabling faster, self-service exploration.
